

INTRODUCTION

Techno Daghigh Industrial Complex was established in 1974 and started its activities in the field of "Industrial Kitchen Equipment".

It was founded to apply advanced technical and industrial methods in Food Industries and to develop the technical knowledge in this field. Reaching the Global Market beyond Domestic Borders is the main objective of the Company.

THE RESULT OF A PASSION OF OVER 40 YEARS

The story of TECHNO DAGHIGH began over 40 years ago with the dream and passion of its founders. A family business, specializing in beverage dispensers, became the market leader and trusted partner of the most important companies in the Hotel, Restaurant and Bar sector nationally and internationally.

TECHNO DAGHIGH means being able to add value to its products; values such as high levels of innovation, quality, design and safety. Anticipating and guiding the market trends are two of the distinctive elements of TECHNO DAGHIGH

VISION RE-INVENTING THE MARKET OF FOOD INDUSTRY.

Re-inventing our market, meeting the demands of innovation, functionality, efficiency and ease of use required by our partners.

MISSION FOR PERFECTION

Our mission is to add new chapters to the history of Food Industries, combining passion with precision and culture with innovation, in order to maintain the **standard of excellence**. To reach this goal, our people have become a fundamental ingredient. **People who believe that quality is above everything else**. People who have chosen to invest in research and foster development from one generation to the next.

Design and produce professional equipment of high quality, create customer loyalty, differentiate ourselves with innovation, create business opportunities, produce reliable machines and be environmental friendly. Based on our experience and business know-how, TECHNO DAGHIGH can provide partners with real support in project development in terms of feasibility, design, production and promotion. Starting from the factory in Tehran, TECHNO DAGHIGH brand and equipment are being found in all over Iran.

MANPOWER

TECHNO DAGHIGH owns two plants located near Tehran, the capital of Iran. One is located in the eastern area of Tehran and another is located in the western area of the capital.

Both plants are equipped with administration offices, production/fabrication lines and warehouses.

The total numbers of manpower working directly and full-time inside TECHNO DAGHIGH Plants are as follows:

Administration: 8

Production Line: 30

After Sales Services: 5

DISTRIBUTION & SALES NETWORK

Our priority is to protect consumers' interest, which we do through the promotion of effectively functioning markets and networks.

WE DON'T SELL PRODUCTS, WE SELL A COMPLETE SERVICE!

The relationship with our customers begins before the purchase and continues through time. We can guide our customers in their choices and **offer timely and skilled customer support services**. This approach is part of our genetic code and is an added value in all of our models. This is the reason why **our customers are never alone**, because we rely on a widespread network of direct distributors, subsidiaries and business partners.

We ensure **excellence of service by providing specific technical training** to our partners and distributors another exclusive attribute of our company.

There are at least 20 potential and active sales agents in major cities of IRAN covering the most important areas of the country from east to west and from south to north.
